

SUPER X LAUNDRY LIQUID

Eco-friendly, powerful liquid laundry detergent is a blend of biodegradable components for excellent results and lower cost in use.

PRODUCT DESCRIPTION

GREENMAN SUPER X LAUNDRY LIQUID is an eco-friendly concentrated detergent blend of proprietary biodegradable components for use in washing overalls and industrial workwear that gets filthy because of tough environmental working conditions. Use GREENMAN SUPER X LAUNDRY LIQUID for excellent results with low cost in use advantages.

COMPOSITION

GREENMAN SUPER X LAUNDRY LIQUID is an environmentally safe, blend of special surfactants, alkaline salts, water softeners, corrosion inhibitors, preservatives and water. GREENMAN SUPER X LAUNDRY LIQUID is used as an all-purpose eco laundry detergent. It is gentle on all types of fabrics and does not run colours. It can be used for all industrial, domestic and general fabric washing applications. It is an excellent and cost-effective

FEATURES

GREENMAN SUPER X LAUNDRY LIQUID may be used in multiple washing operations including hand and machine washing. It is a medium foaming detergent, ideally suited to multi stage washing machines. It is highly economical with a fraction of conventional detergent needed per kg of laundry, dependent on soiling. GREENMAN SUPER X LAUNDRY LIQUID is compatible with all types of water, including brackish, salty and hard water. It also improves the removal of oily food soils from fabrics. GREENMAN SUPER X LAUNDRY LIQUID has the potential to reduce electricity requirements as it can be used for cold washing.

CONCENTRATE WITH ACCU DOSE

GREENMAN SUPER X LAUNDRY LIQUID is uniquely formulated in super concentrate versions, which not only saves tremendously on finished product costs by not blending it with mostly water, but it saves very significant storage space, minimizing shipping, transport and logistics costs.

To reduce weight and pack size on average, 95% water content is removed in Fab-Soft concentrate and 80% water content for GREENMAN SUPER X LAUNDRY LIQUID concentrate.

The product is packaged with a unique 1l Accu-Dose dosing bottle which neatly and accurately dispenses in micro increments from 5ml to 50ml for the ultimate in dispensing control, which completely avoids spillage and wastage. The conventional way of dispensing involves a few inaccurate and unmeasured bottle caps, which can quickly unnecessarily double or even triple product usage. Once an amount is measured out with the Accu-Dose system it is physically impossible to over dispense the required amount.

TOUGH SYNTHETIC GREASES

Severe synthetic oil and grease stains can be extremely hard for conventional detergents to clean. In these instances, safely spot clean or pre-soak with GREENMAN ECO SOLVE or add GREENMAN ECO SOLVE to SUPER X in the main cycle to effortlessly remove these oils.

SUPER X LAUNDRY LIQUID

Eco-friendly, powerful liquid laundry detergent is a blend of biodegradable components for excellent results and lower cost in use.

PRE-SOAKING AND WHITENING

GREENMAN OXY CLEAN is a colour safe detergent additive for GREENMAN SUPER X LAUNDRY LIQUID which is particularly effective in tackling tough stains and brightening clothes as well as overnight bucket soaking applications for mops, rags, cloths and more.

DIRECTIONS / USAGE

Commercial Machine Washing: Use at 25 - 50ml per kg for average soiling.

Automatic Home Machines: Use at 180ml to 360ml per full load of washing (7.2kg Capacity Machine)

Hand Washing: Can be used by adding between 100ml and 200ml to a wash tub. Hand washing may be done as a pre-wash. Soak before using a final machine wash.

The above doses are for average soiling. Increase if necessary.
